

PYTHON with DJANGO Course Contents

Introduction

- ❖ Python and its uses
- ❖ Installing Python and PyCharm
- ❖ Hello world Program in Python
- ❖ Some mathematical operations in Python
- ❖ Strings in Python
- ❖ Accepting Input from the user in Python
- ❖ Performing operations on a string in Python
- ❖ Variables in Python
- ❖ In place operators in Python
- ❖ Writing the first program in PyCharm

Control structures in Python

- ❖ If statement
- ❖ Elif statement
- ❖ Introduction to list in Python
- ❖ List operations in Python
- ❖ List functions in Python
- ❖ Range function in Python
- ❖ Code reuse and functions in Python
- ❖ For loop in Python
- ❖ Boolean logic in Python
- ❖ While Loop in Python

Functions and Modules in Python

- ❖ Passing arguments to functions
- ❖ Making function return value
- ❖ Passing functions as arguments
- ❖ Modules

Exception Handling and File Handling in Python

- ❖ Errors and Exceptions
- ❖ Exception handling
- ❖ Finally Block
- ❖ File Handling
- ❖ Reading Data from file
- ❖ Adding data to file
- ❖ Appending to a file

Some More Types in Python

- ❖ Dictionaries
- ❖ Dictionary Functions
- ❖ Tuples
- ❖ List Slicing
- ❖ List Comprehension
- ❖ String Formatting
- ❖ String functions
- ❖ Numeric Functions

Functional Programming in Python

- ❖ Functional Programming
- ❖ Lambdas
- ❖ Map
- ❖ Filters
- ❖ Generators

Object Oriented Programming in Python

- ❖ Object Oriented Programming
- ❖ Inheritance
- ❖ Recursion
- ❖ Sets
- ❖ Itertools
- ❖ Operator Overloading
- ❖ Data Hiding
- ❖ Method Overloading

Regular Expressions in Python

- ❖ Regular Expressions
- ❖ Search and Find all
- ❖ Find and Replace
- ❖ The dot metacharacter
- ❖ Caret and Dollar metacharacter
- ❖ Character class
- ❖ Star metacharacter
- ❖ Group

Create GUI Apps in Python using Tkinter

- ❖ Tkinter: Hello world program
- ❖ Using frames
- ❖ Grid layout
- ❖ Self adjusting widgets
- ❖ Handling buttons clicks
- ❖ Using Classes
- ❖ Using drop downs

IT TRAINING & SERVICES

Regd. Office # 207, II floor, HUDA Maithrivanam, Ameerpet, Hyderabad 500 038.

Ph # +91 40 40310000, 23743392.

E-mail: enq@peerstech.com URL: www.peerstech.com

- ❖ Toolbar
- ❖ Making Status Bar
- ❖ Message Box
- ❖ Drawing

Building a Calculator using Tkinter

DJANGO

Make Web applications in Python using Django

- ❖ Installing Django
- ❖ Creating first Django Project
- ❖ Creating our own App
- ❖ Overview of an App in Django
- ❖ Creating our own views in Django
- ❖ Applying Migrations
- ❖ Creating Books Table in Django
- ❖ Final Steps in Creating a Table
- ❖ Adding data to the Database Tables
- ❖ Filtering the results
- ❖ Admin Panel in Django
- ❖ Creating another view
- ❖ Connecting to the Database
- ❖ Creating Templates
- ❖ Rendering Templates
- ❖ Raising a 404 error
- ❖ Designing the detail view
- ❖ Removing the Hardcoded URLs
- ❖ Namespaces in Django
- ❖ Using Static files
- ❖ Creating Navigation bar
- ❖ Navigation bar touchup
- ❖ Using Base Templates
- ❖ Generic Views in Django
- ❖ Design Touchup
- ❖ Form to add books
- ❖ Final source code for Django

Make Web Applications in Python using Flask

- ❖ Creating Directory Structure
- ❖ Hello world
- ❖ Routing
- ❖ Variables
- ❖ Dynamic Urls
- ❖ Passing Data to the Server
- ❖ Templates
- ❖ Templates passing data
- ❖ Using Templates
- ❖ Passing from data to templates
- ❖ Using Cookies

Make Web Applications in Python using Django 2.0
